WANTED: Full-stack Developer, Full-Time

Job description

Optiflux NV is a start-up company active in the storage and commercialization of fresh fruit and vegetables. Based on our hardware platform and cloud-based software services, we provide technology to growers, cooperatives and traders worldwide, enabling them to deliver the highest quality of fresh products to the consumer year-round and in the most sustainable way.

As a full-stack developer you will participate in building Optiflux' software services. Hereto, you will set up databases and data flows between devices at the customer site and the Optiflux cloud. You will implement data science algorithms in the cloud platform and develop the front- and backend of the Optiflux webapps. You will deploy and maintain these applications.

You:

- Love innovative technology, and you would like to contribute to the realization of cloud-based solutions for a more sustainable society
- Understand the behavior of the user and you process that in your software
- Write clean, maintainable code and related documentation
- Like collaborating with fellow coders. You work towards deadlines together with colleagues and external parties and when it gets stressful, you can handle this perfectly
- Can work independently
- Are eager to learn and to continuously improve your skills
- Can easily adapt in a changing environment
- Have a master's degree computer science with 3 years of experience, or equal through experience
- Master the Dutch and English language in word and writing
- Have a driving license type B

Experience with following is required:

- HTML, CSS, Javascript and React.js
- Node.js, Typescript, MySQL, Bash, Python and Docker
- MQTT
- REST APIs
- Tools Git and Postman

Our offer:

- A challenging job in a young and dynamic team and company
- Working on state-of-the-art technology for the fruit and vegetables of tomorrow
- Plenty of room for initiative and development
- A market aligned salary with ample opportunity for growth

Location:

Optiflux NV
