

## Job description

Optiflux ([www.optiflux.world](http://www.optiflux.world)) is seeking a highly motivated AI Team Lead to spearhead our AI team for quality inspection of fresh produce using computer vision. This role offers an exciting opportunity to work on cutting-edge AI projects within the AgTech industry. The ideal candidate will have a proven track record in AI development and deployment, relevant industrial experience, and a strong drive to push the boundaries of AI in agriculture.

## Responsibilities

- Lead AI research and development activities of current and future products
- Create a roadmap for the next generation of products and critically analyze existing products.
- Closely collaborate with cross-functional teams to define project objectives and deliver solutions integrated into current workflows.
- Meet project deadlines while maintaining a high level of accuracy and attention to detail.
- Manage the AI team, assisting with hiring, onboarding, and mentoring/coaching colleagues

## Qualifications

- Degree in a relevant field (e.g., AI, Data Science, Statistics, Computer science), or equivalent experience.
- Strong analytical and problem-solving skills with a creative mindset.
- Proficiency in deep learning frameworks (Tensorflow, PyTorch).
- Proficiency in AI tools and programming languages (Python, R, SQL).
- Familiarity with DevOps, DataOps, MLOps, principles including code repository, code management, CI/CD and AI-related automation.
- Proficient in English, both oral and written. Other languages are a plus.
- Ability to work independently and collaboratively in a fast-paced environment.
- Eagerness to learn and stay updated on advancements in AI and agricultural technology.

## Benefits

- A key role in our team, with opportunities for professional development, personal growth and career advancement.
- Flexible work schedule and hybrid working policy.
- Dynamic and inclusive work culture with a focus on innovation and collaboration.

## About Optiflux
